

MILTECH™ 9012

Compact, Portable Military Managed Gigabit Ethernet Switch

FEATURES DESCRIPTION

Driven by rapid advancement and lower costs, Ethernet is becoming the standard for IP-based components in a wide range of military and commercial applications, including:

- Battle management systems (BMSs)
- UAVs
- Land autonomous vehicles (UGVs)
- Robots
- Mobile equipment fielded in harsh environments

Modern platforms contain dozens of network devices that must be interconnected. The MILTECH9012 is an ideal solution for mobile Ethernet-equipped platforms. With the best combination of size, weight, power and cost (SWaP-C) in the industry, it saves valuable real estate for computers, sensors, targeting systems, and other devices that make mobile platforms highly effective.

The MILTECH9012 is a MIL-STD, fully managed military grade network switch offering 12 triple-

speed (10/100/1000Mbps) ports. It can be remotely managed to optimize communications and prioritize critical information traffic. Advanced network features, never before found in a package of this size, include switching protocols, virtual LANS (VLANs), traffic prioritization (QoS), and bandwidth aggregation are standard.

The MILTECH9012's gigabit speeds and 24VDC power make it instantly compatible with any network device and power systems.

The MILTECH9012 is widely used in battlefield communications C4ISR, video, sensor data acquisition and transmission. Its mechanical packaging enhancements, including sealed SCE2 circular connectors, is designed for MIL-STD-810F airborne and ground environmental compliance and high reliability. Leveraging best-in-class switching technology, the MILTECH9012 serves as a robust commercial off-the-shelf (COTS) solution for rugged LAN connectivity.
